SINCE 1968

Hirsch has been helping apparel decorators of all levels. Whether you are a beginner or a seasoned veteran, Hirsch has the tools you need to start, grow and diversify your business. Our industry experts are well equipped to support you. We have experience in all types of decoration; embroidery, DTG, DTF, wide format, screen printing, laser engraving, and software automation.

AT HIRSCH

We measure our success only by the success of our customers. We are committed in our efforts to educate, train and support you with our team product and technical experts. Hirsch understands the impact that customer feedback has on the growth of our industry, which is why we work closely with our brand manufacturers to keep bringing innovative features to the market.

ANYONE CAN BE AN EMBROIDERY SPECIALIST

TMEZ is the World's First embroidery machine with automatic thread tension adjustment. i-TM and DCP are unmatched features that deliver high-quality and stable stitches. These techologies virtually eliminate the need to have a skilled operator adjust the upper thread tension according to the stitch, design, or material, as needed on conventional machines.

TMEZ-SC1501

The large 12.1 inch operation panel features convenient icons, allows you to switch operating language, and has high-capicity memory.

Mimaki

UJV300DTF-75

UV-DTF Printer

UV-DTF technology allows for UV printing on a 2-part film, which is transfered like a sticker to any hardgood or custom item. Since only the design printed on the film is transferred to the object, UV-DTF completely eliminates the need for any manual weeding and improves production efficiency.

330 Series

UV-LED Roll to Roll Printer

Thanks to the instant-drying nature of UV-cureble inks, you can seamlessly perform print & cut operations, expanding your printing possibilities. With just one machine, you can create a wide range of applications, inlcuding store decorations, posters, labels, stickers, window graphics, and more. The white, and clear ink channels, allows for layered printing which can add dimension and textures to your graphics.

CJV200 SERIES

Eco-Solvent Print & Cut Inkjet Printer

CJV200 Series is a print & cut eco-solvent inkjet printer which equipped with a single print head of 330 Engine in our flag-ship printer, enabling even inexperienced operators to produce printed products beautifully, quickly, and easily. This entry-level model is suitable for creating display graphics of all types, including vehicle wraps, and come with a 3 year parts warranty, including print heads.
