## Central

## Ultimate Machine and Operator Efficiency

- **Supercharge Efficiency:** Enable operators to manage more machines simultaneously, cutting labor costs and enabling business growth.
- **Instant Alerts:** Stay informed with push notifications for critical issues like machine downtime and thread breaks.
- **Maximize Machine Output:** Clone top-performing production settings across your machines to ensure consistent peak performance.
- **Save Time and Eliminate Waste:** Use barcode scanning for design transfers, eliminating cumbersome USB processes and reducing errors.
- **Stay Ahead of the Curve:** Ensure your machine is running with the latest technology by remotely updating the firmware.
- **Rapid Problem Solving:** Get up and running quickly by remotely retrieving machine log files to identify issues.

## Dive Deep with Dashboards and Reports

- **Your Data, Your Way:** Customize dashboards to focus on what truly matters to your business.
- **Deep Insights that Drive Decisions:** Flexible, comprehensive reporting tools for machine, operator, and design performance.
- **Real-Time Visibility:** Get a live view of your production floor from anywhere in the world.
